EDUCATION

- **University of Colorado Boulder** Boulder, CO
 - **Master of Science** in *Computer Science*; **GPA: 3.83/4.0** *Aug 2017 – Present (Expected: May 2019)*
Relevant courses: BigData, ML, NLP, Probabilistic Models for ML, Computer Vision, and, Object Oriented Design.
- **BMS College of Engineering** Bangalore, India
 - **Bachelor of Engineering** in *Information Science and Engineering*; **GPA: 8.92/10.0** *Sep 2011 – May 2015*

PROGRAMMING SKILLS

- **Languages:** Python, C#, Java, Scala, Ruby, C++, C, PHP, MATLAB, and NodeJs.
- **Frameworks:** Tensorflow, Keras, ASP.NET, Flask, Ruby on Rails, SpringMVC, ReactJs with Redux.
- **Databases:** MS SQL Server, Postgres, MySQL, and MongoDB.
- **Others:** Spark, Kafka, Redis, AWS(Lambda, EMR, EC2), Heroku, Qubole, CI, Docker.

EXPERIENCE

- **SDE Intern** (Data Engineering) - **Expedia Inc**, Chicago, USA May 2018 - Aug 2018
 - Productionalized a price recommendation ML algorithm using technologies like Qubole, Spark and AWS Lambda.
 - Contributed to the ideation and implementation of restructuring the existing data pipeline for performance.
- **Teaching Assistant** (S/W Dev Methods & Tools) - **University of Colorado Boulder** Sep 2017 - Present
 - Teaching 60 students, full stack development and deployment of applications using core Agile principles and TDD.
 - Training students on technologies like Shell Scripting, HTML/CSS, JS, Git, REST, MySQL, PHP, CI, and Heroku.
- **Application Developer** - **ThoughtWorks**, Bangalore, India Aug 2015 - Aug 2017
 - **Project Management Tool (C#, Silverlight, ASP.NET):** A Multi-tenant SaaS application having about 2000 tenants and 2000-5000 users per tenant.
 - * Spearheaded the re-architecture of the legacy application using Test Driven Development for scale.
 - * Refactored the code base by introducing design patterns. Also increased the test coverage from 16% to 65%.
 - * Optimized complex SQL queries to improve the performance of key features by around 80%.
 - **Food-Supplies Management (Python, Sklearn, Keras):** A stock management tool to help the pantry of the office plan the supply of fruits, vegetables, and grocery in order to minimize wastage of food.
 - **Danglay (Ruby, Ruby on Rails):** A scalable carpooling web application using Ruby on Rails to solve the problem of commute faced by numerous employees at ThoughtWorks.
- **Freelancer** (Embedded System Prototyping) - **Self Employed**, Bangalore, India Oct 2014 - June 2015
 - **EMG Controlled Wheelchair (Arduino, C):** A wheelchair which was controlled by an electromyograph, aimed at helping paraplegic patients move around. This system could also be controlled by a voice recognition unit.
 - **Surveillance System (Java, Android, Python, C):** Security system that enabled the owner to control the entrance gates and lockdown the house. This system also provided live surveillance of the house on a smart-phone.

PROJECTS

- **SparkBusters (Java, Spark, Kafka, Redis)**: A big-data project that performed Opinion mining on tweets of a commercial product. These opinions were visualized on a Map based on the sentiment score. **Links:** *Demo*, *GitHub*.
- **Object 3D Pose Estimation (Python, Tensorflow, C#, Unity)**: Using a Convolutional Neural Network to predict an object's 3D pose to generate real and virtual object interactions in a Hololens. **Links:** *Demo*, *Paper*, *GitHub*.
- **Agile board (Java, SpringMVC)**: A web based Agile board developed for an OOP-design cum refactoring exercise. Devised a *custom design pattern* as part of the project implementation. **Links:** *App*, *GitHub*.
- **Navisys (Java, Android, Python, C++, OpenCV)**: An embedded system fitted into a jacket that provides turn-by-turn navigation with human and obstacle detection to the visually impaired. **Links:** *Report*, *Synopsis*.
- **Teacher's cube (Python, Bash)**: Electronic mnemonic cubes, representing alphabets of a language, that pronounced the word formed when arranged one beside the other. Aimed to help dyslexic children formulate and pronounce words.

ACHIEVEMENTS

- 'Outstanding Teaching Assistant' award for having the best Faculty Course Questionnaire(FCQ) scores in the Computer Science department of the University of Colorado Boulder for the academic year 2017-2018.
- 'Best Research Project' award at the IEEE International Advance Computing Conference 2015, held at B.M.S College of Engineering. The project also featured in the *newspaper(link)* for its novel approach of implementation.
